

Don Tony Perez Wines

2019 GRAN RESERVA CABERNET SAUVIGNON

WINEMAKER'S COMMENTS

With an intense ruby red color, a long finish, and several fascinating flavors, this flavorful wine has aged beautifully and hosts all the right Cabernet qualities that are present on the nose and palate.

TASTING NOTES

This wine is distinguished by bright cherry and red fruit aromas with black pepper notes, elegantly combined with wood from aging. It features good volume on the palate and strong character tannins. It is fresh and juicy on the palate but well-balanced with vanilla notes.

FOOD PAIRINGS

Expressive and elegant, this exceptionally food-friendly wine will pair delightfully with a variety of dishes, from grilled skirt steak with salsa verde, to pappardelle with rabbit ragout, to Turkish style lamb meatballs.

CURICÓ VALLEY, CHILE

- Located in** the Maule region in Chile, Curicó Valley is one of the most important valleys for the production of quality wines in the country. The climate and soil conditions are ideal for the cultivation of different grape varieties, which create abundant diversity in the wines produced in the area.
- The climate** is characterized as Mediterranean, with hot, dry summers and mild, humid winters. These conditions allow for a slow and complete maturation of the grapes, which provides greater complexity and concentration of flavors in the wines. In addition, the cool breezes that come from the coast in the afternoons help cool the vines and maintain the acidity in the grapes—an important factor in the quality of the wines.
- The soil** is of alluvial origin, formed by sediment deposits brought by the rivers of the area. This gives the land a great mineral wealth, which translates into wines with great expression and complexity of flavors. The soil also has great permeability, which allows the roots of the vines to grow deeply and seek the necessary nutrients for the proper development of the plant.
- Various grape varieties** are grown in the Curicó Valley, among which Cabernet Sauvignon, Merlot, Syrah, Carménère, and Sauvignon Blanc stand out. Each of these varieties adapts differently to the climate and the soil in the area, resulting in a wide range of wines with different characteristics and flavor profiles.

TECHNICAL DATA

| | |
|-----------------|--|
| Composition | 100% Cabernet Sauvignon |
| Aging | 12 Months French and American Oak (GRAN RESERVA) |
| pH | 3.55 |
| Total Acidity | 5.21 g/L |
