

Don Tony Perez Wines

2020 CABERNET SAUVIGNON

DonTonyPerez.com

143 Woodworth Ave. Yonkers, NY

WINEMAKER'S COMMENTS

Tremendously approachable for such a young Cabernet with ruby red hues.

TASTING NOTES

An earth-driven, very mineral wine, mushrooms and potting soil are quite apparent on the nose of this Cabernet but fade to the background across the palate. Leather, berries, and cinnamon come to life once tasted, along with wet wood and dark chocolate thanks to the mature barrels used in production. It is bright and fruity on the nose with mixed fresh herbs and light vanilla notes. This wine has good medium-bodied tannins and offers a balanced, lingering finish.

FOOD PAIRINGS

This Cabernet Sauvignon is a versatile red wine that pairs well with most red wine friendly dishes. It is as good with pasta and burgers as it is with beef Wellington.

CURICÓ VALLEY, CHILE

- 🌀 **Located in** the Maule region in Chile, Curicó Valley is one of the most important valleys for the production of quality wines in the country. The climate and soil conditions are ideal for the cultivation of different grape varieties, which create abundant diversity in the wines produced in the area.
- 🌀 **The climate** is characterized as Mediterranean, with hot, dry summers and mild, humid winters. These conditions allow for a slow and complete maturation of the grapes, which provides greater complexity and concentration of flavors in the wines. In addition, the cool breezes that come from the coast in the afternoons help cool the vines and maintain the acidity in the grapes—an important factor in the quality of the wines.
- 🌀 **The soil** is of alluvial origin, formed by sediment deposits brought by the rivers of the area. This gives the land a great mineral wealth, which translates into wines with great expression and complexity of flavors. The soil also has great permeability, which allows the roots of the vines to grow deeply and seek the necessary nutrients for the proper development of the plant.
- 🌀 **Various grape varieties** are grown in the Curicó Valley, among which Cabernet Sauvignon, Merlot, Syrah, Carménère, and Sauvignon Blanc stand out. Each of these varieties adapts differently to the climate and the soil in the area, resulting in a wide range of wines with different characteristics and flavor profiles.

TECHNICAL DATA

Composition	100% Cabernet Sauvignon
Aging	3 Months Stainless Steel
pH	3.64
Total Acidity	5.17 g/L
Residual Sugar	28.48 g/L
Alcohol	13%
Harvest	March - April
Case Production	200K
